

User Security Management Solutions

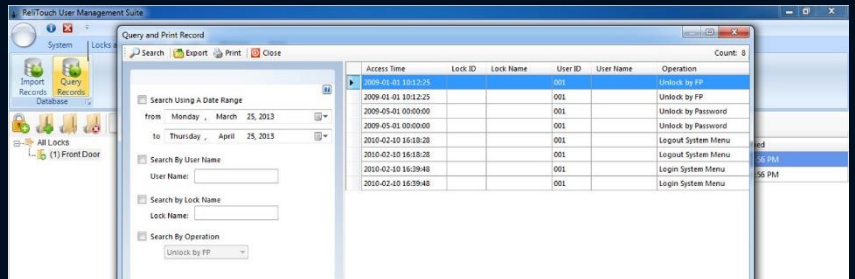

ReliTouch User Management Suite

"Manage access to your facility with the click of a mouse"

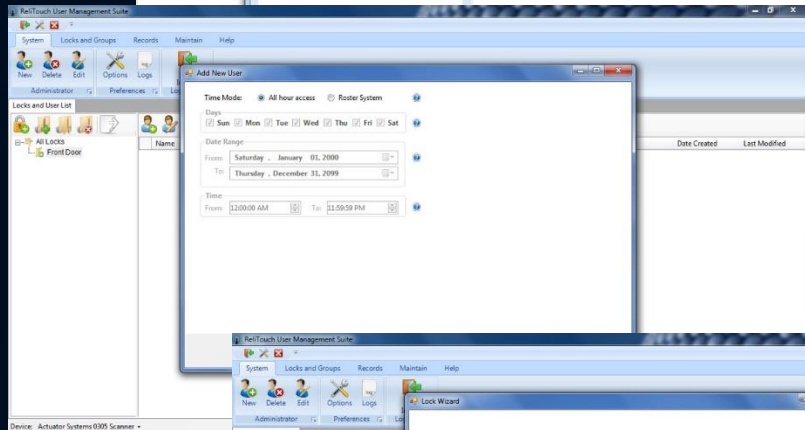

Manage Users and Locks quickly and easily

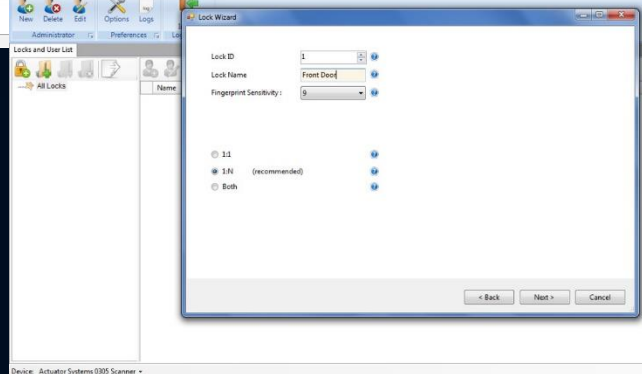

Audit Trail View →

Adding Access Times →

Quickly add a new user
With the built-in wizard →

ReliTouch[®]

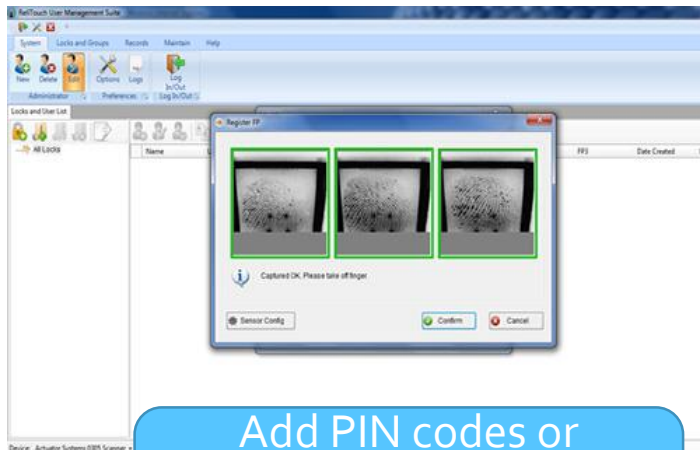

Includes a USB Fingerprint Scanner and a USB Flash Drive in the box. Next generation access control in a matter of minutes.

Ease of Use

Most user management software packages are aimed at software development professionals and engineers. Our approach with the ReliTouch User Management suite was to provide a streamlined, easy to use package that anyone can pick up and use the first time they sit down with it.

The RUMS suite allows you to manage any number of users and locks effortlessly changing access times, pin codes, moving users and user groups between locks. Creating groups of locks is a snap.

Features

- Easily manage users for one or more locks including adding PIN codes and fingerprints
- Edit any individual user permissions, allowed entry times for each and more
- View and analyze audit trails from any lock in your network
- Quickly copy locks to new locks saving you time and money
- Backup and Restore all of your locks databases with a single click
- Edit global lock settings for each lock including global access times and much more
- Easily transfer data from your locks via a USB Flashdrive that is included in your software package. A USB Fingerprint scanner is also included that allows you to quickly add new users right from your desk.
- Allows each lock to have a different set of up to 1,000 users and allows you to cut and paste individual users or even groups of users to any lock in seconds.
